These 200 math logic puzzles will engage and stimulate your child's problem solving ability through addition, subtraction and multiplication of healthy foods. In early childhood education it has been demonstrated that a correlation exists between the level of a child's mathematical ability and their future academic success. The reverse of this relationship has also been observed, where children who are behind the mathematical skills of their peers, continue to fall behind in future studies (Pelkowski, et al. 2019). Furthermore, it is well established in literature that the more maths learning opportunities a child is exposed to, the more growth they will experience in math knowledge (Piasta, et al. 2015). This book is designed to provide a math learning opportunity to foster the curiosity and confidence of children aged 12-14 and set them well on the path to academic success. ?
