I have spent the better part of the last 53 years taking well over a thousand multiple choice tests. As a teenager, I struggled through high school. Armed with an average IQ and some fairly significant learning disabilities, I barely graduating with a 1.4 grade point average. However, I was smart enough to figure out early on that much of academics, and that achieving success in academics, had far more to do with the ability to master multiple choice tests than raw intellect. From there I began a 35 year study on the art and science of passing, mastering and scoring high on multiple choice tests. Despite a very substandard high school GPA, I scored high enough on the SAT and the ACT to be accepted to the University of Michigan, one of the top academic institutions in the Country. Upon graduation from college, I accepted a commission as an officer in the United States Marine Corps. As a Marine Officer, I completed dozens of military and civilian schools, including a Masters Degree from Boston University, and a Juris Doctor Degree from the University of Detroit School of Law. In fact, I earned a full ride military scholarship to law school based primarily on the fact I scored so highly on the Law School Aptitude Test (98th percentile). Upon completion of law school, I passed the Michigan Bar exam on the first attempt, scoring 149 points on the multistate (the multiple choice portion of the exam), which was one question away from automatic passage (at 150 they examiners do not need to grade the essay portion). I have also taken and applied many of the Marine Corps concepts of discipline and mental toughness to the art of preparing for, taking, and passing multiple choice tests. Resigning my commission and leaving the Marine Corps in 1990, I continued both my education as well as honing my test taking skills. I currently hold 12 professional licenses and 5 professional designations, which required me to pass several comprehensive and difficult multiple choice examinations. I have also attended dozens of professional test preparation courses. From those courses I have "cherry picked" all of the valuable lessons and test taking tips and have included those in this book. One of the professional licenses I hold is a paramedic license. As a paramedic I have gained a much greater understanding of the anatomy and physiology of test taking. Test taking is all about the central nervous system, which of course includes the brain. However, as I explain in this book, it is clear that the sympathetic and parasympathetic nervous systems have as much to do with passing and failing multiple choice tests as does the brain. Accordingly, I have also applied many of those principals in this book. Learn and Practice Proven multiple choice strategies for Reading Comprehension, Word Problems, English Grammar and Basic Math! The most comprehensive and authoritative book in its field, this edition has been extensively revised and updated. This book is intended for anyone who develops test items for large-scale assessments, as well as teachers and graduate students who de Constructing test items for standardized tests of achievement, ability, and aptitude is a task of enormous importance. The interpretability of a test's scores flows directly from the quality of its items and exercises. Concomitant with score interpretability is the notion that including only carefully crafted items on a test is the primary method by which the skilled test developer reduces unwanted error variance, or errors of measurement, and thereby increases a test score's reliability. The aim of this entire book is to increase the test constructor's awareness of this source of measurement error, and then to describe methods for identifying and minimizing it during item construction and later review. Persons involved in assessment are keenly aware of the increased attention given to alternative formats for test items in recent years. Yet, in many writers' zeal to be 'curriculum-relevant' or 'authentic' or 'realistic', the items are often developed seemingly without conscious thought to the interpretations that may be garnered from them. This book argues that the format for such alternative items and exercises also requires rigor in their construction and even offers some solutions, as one chapter is devoted to these alternative

formats. This book addresses major issues in constructing test items by focusing on four ideas. First, it describes the characteristics and functions of test items. A second feature of this book is the presentation of editorial guidelines for writing test items in all of the commonly used item formats, including constructed-response formats and performance tests. A third aspect of this book is the presentation of methods for determining the quality of test items. Finally, this book presents a compendium of important issues about test items, including procedures for ordering items in a test, ethical and legal concerns over using copyrighted test items, item scoring schemes, computer-generated items and more. "The Bond 11+ CEM Test Papers Pack 1 are realistic exam-style papers designed to help prepare for the CEM (Durham University) 11+ tests. Each paper is designed to take 45 minutes, to replicate test conditions and develop essential skills for exam success."--Folder. From reviews of SINCE TOMORROW: "SINCE TOMORROW is the best post-apocalyptic novel I've read since Cormac McCarthy's THE ROAD" Jo Vonbargen "...a magnificent book that lays out an exquisitely formed vision of a broken world." A.F. Stewart "I could've been reading Faulkner or Hemingway, the writing was so powerful." Frederick Lee Brooke An old man rides a workhorse through the night, across mudslides, past stores abandoned for decades, past the rotted corpses of automobiles invisible under mounds of blackberry. Rain courses from his rabbit skin poncho. He carries a sword and a spear. He knows where to find the murderer. He will face him alone. "Since Tomorrow" is a novel of a world in the remaking. The old man, Frost, remembers the "good times". Those who live on his "farm" among collapsed warehouses and the foundations of vanished houses struggle to maintain human values. But when others in this makeshift world are driven only by greed and the need for power, all values must ultimately be replaced by the simple instinct for survival. In this full length novel Morgan Nyberg takes the reader to the West Coast of Canada, where the city of Vancouver has been transformed by climate change, pandemic, economic collapse and earthquake into "Town", a squalid, lawless place inhabited the desperate, the diseased and the dying. Taking advantage of this state of affairs is the formidable Langley, who grows poppies to produce "skag", a crude form of opium. Langley has amassed enough power to control a small private army. Now he is determined to acquire Frost's farm for himself. Recklessly opposing Langley is Frost's fearless but impulsive granddaughter, Noor. Like Russell Hoban's "Riddley Walker" or Cormac McCarthy's "The Road", "Since Tomorrow" demonstrates that there is room in the post-apocalyptic genre for exceptional writing. Morgan Nyberg tells nothing - he shows everything. In clear, sensuous prose free of commentary or explanation - prose as addictive as Langley's skag - he leads the reader toward that climactic night with Frost on his horse, and farther, to the threshold of a new, perhaps happier, era.
